Eli Schiffler

elischiffler.dev | (612) 704-6616 | schifflereli@gmail.com | linkedin.com/in/eli-schiffler | github.com/elischiffler

EDUCATION

California Polytechnic State University, San Luis Obispo Graduation: May 2027
B.S. in Computer Science GPA: 3.70 | Dean's List: 8/8
Study Abroad: CEA CAPA Barcelona, Fall 2025

WORK EXPERIENCE

Robert Half Summer 2026 – Present
Software Engineering Intern, Part-time (Remote)

- Completed an Azure AI Foundry inquiry chatbot with two-way data validation between the chatbot and a server, and integrated collected lead data with Salesforce.
- Building a GEO application to track prompt data and calculate AI visibility, share of voice (SOV), rank, and citation rate to identify website representation opportunities; OpenAI, Claude, Gemini, and Perplexity integrations are in progress.
- Built an employee verification portal serving Robert Half and Protiviti with dynamic brand switching and full internationalization support.
- Implemented Microsoft Entra ID authentication with custom role-based access control for secure enterprise user management.

Sandia National Laboratories Summer 2025
Quantum Engineering Intern (Albuquerque, NM)

- Aligned optical systems to trap and cool barium ions using precise laser beam paths for quantum hardware experiments.
- Optimized single-mode optical fiber coupling through iterative micro-positioning, achieving up to 80% light collection efficiency.
- Collaborated daily with doctoral researchers to troubleshoot and optimize experimental quantum hardware setups.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL, HTML/CSS
Frameworks & Tools: React, Node.js, Express, FastAPI, Vite, Jest, Cypress, Playwright, Qiskit
Cloud & Platforms: AWS (EC2, Lightsail, Cognito), Azure (AI Foundry, DevOps, Static Web Apps), Supabase, PostgreSQL, Salesforce, GitHub Actions
Methodologies: Full-Stack Development, CI/CD Pipelines, Agile/Scrum, DevOps, RESTful APIs, AI/LLM Integration, LLM Agents, GEO/Prompt Engineering

PROGRAMMING PROJECTS

Mentro – *Chrome Extension* TypeScript, React, Chrome MV3, Vite, Supabase, LLM APIs

- Shipped a Chrome Web Store extension that scores AI prompts in real time across ChatGPT, Gemini, Perplexity, and Claude.
- Engineered a hybrid scoring engine combining instant heuristic analysis with async LLM feedback to surface suggestions before send.
- Built full CI/CD pipeline with Vitest unit tests and Playwright end-to-end coverage.

UMami – *Campus Dining Platform* React, Node.js, Express, Supabase, PostgreSQL, Jest, Cypress

- Developed a "Yelp for Cal Poly dining" with verified student reviews, nutrition labels, allergen info, and real-time restaurant hours.
- Built interactive campus map with Google Maps directions, automated menu scrapers, photo uploads, and a social following system.
- Deployed to Azure Static Web Apps with Jest and Cypress test suites running in CI/CD.

RoadtripsAreFun – *Travel Planner* React, Python, FastAPI, Neon Postgres, CP-SAT, EC2, Vercel

- Built a full-stack road trip planner backed by a database-only places catalog in Neon Postgres.
- Implemented CP-SAT itinerary planning with opening-hours and access constraints.
- Deployed and hosted the FastAPI backend on AWS EC2, with the React frontend on Vercel.

CAMPUS INVOLVEMENT

Quantum Computing Club – *President* January 2024 – June 2026

- Grew club membership 400% by introducing hands-on projects that give members practical quantum computing experience.
- Built a Python CLI tool using Qiskit to automate randomized benchmarking across IBM Quantum processors, identifying optimal run windows and processor stability patterns.
- Developed original lesson plans making complex topics like quantum gates, circuits, and algorithms approachable for all levels.
